

# What is Cocoly?

# The 1st Granular Water-soluble Fertilizer in China

In 2013, Cocoly company created a new category of fertilizers, **granular water-soluble fertilizer**, and named it **Cocoly**. It combines the advantages of chemical, organic and biological fertilizers and has no competitors in the market.

# What are the differences?

2013

## Traditional Water-soluble Fertilizer (Only powder or liquid type)

V S

## Granular Water-soluble Fertilizer

**Incomplete nutrition (Powder type)**  
Liquid nutrients can not be added such as amino acids

**Inconvenient to use (Liquid type)**  
Can only be used after dissolving in water

**Comprehensive nutrients**  
Combines the advantages of chemical and biological fertilizers

**Convenient to use**  
All irrigation and application methods are available

**100% Water-soluble**

## Convenient To Use

**Drip Irrigation**

**Sprinkler Irrigation**

**Flush Irrigation**

**Basal Fertilization**

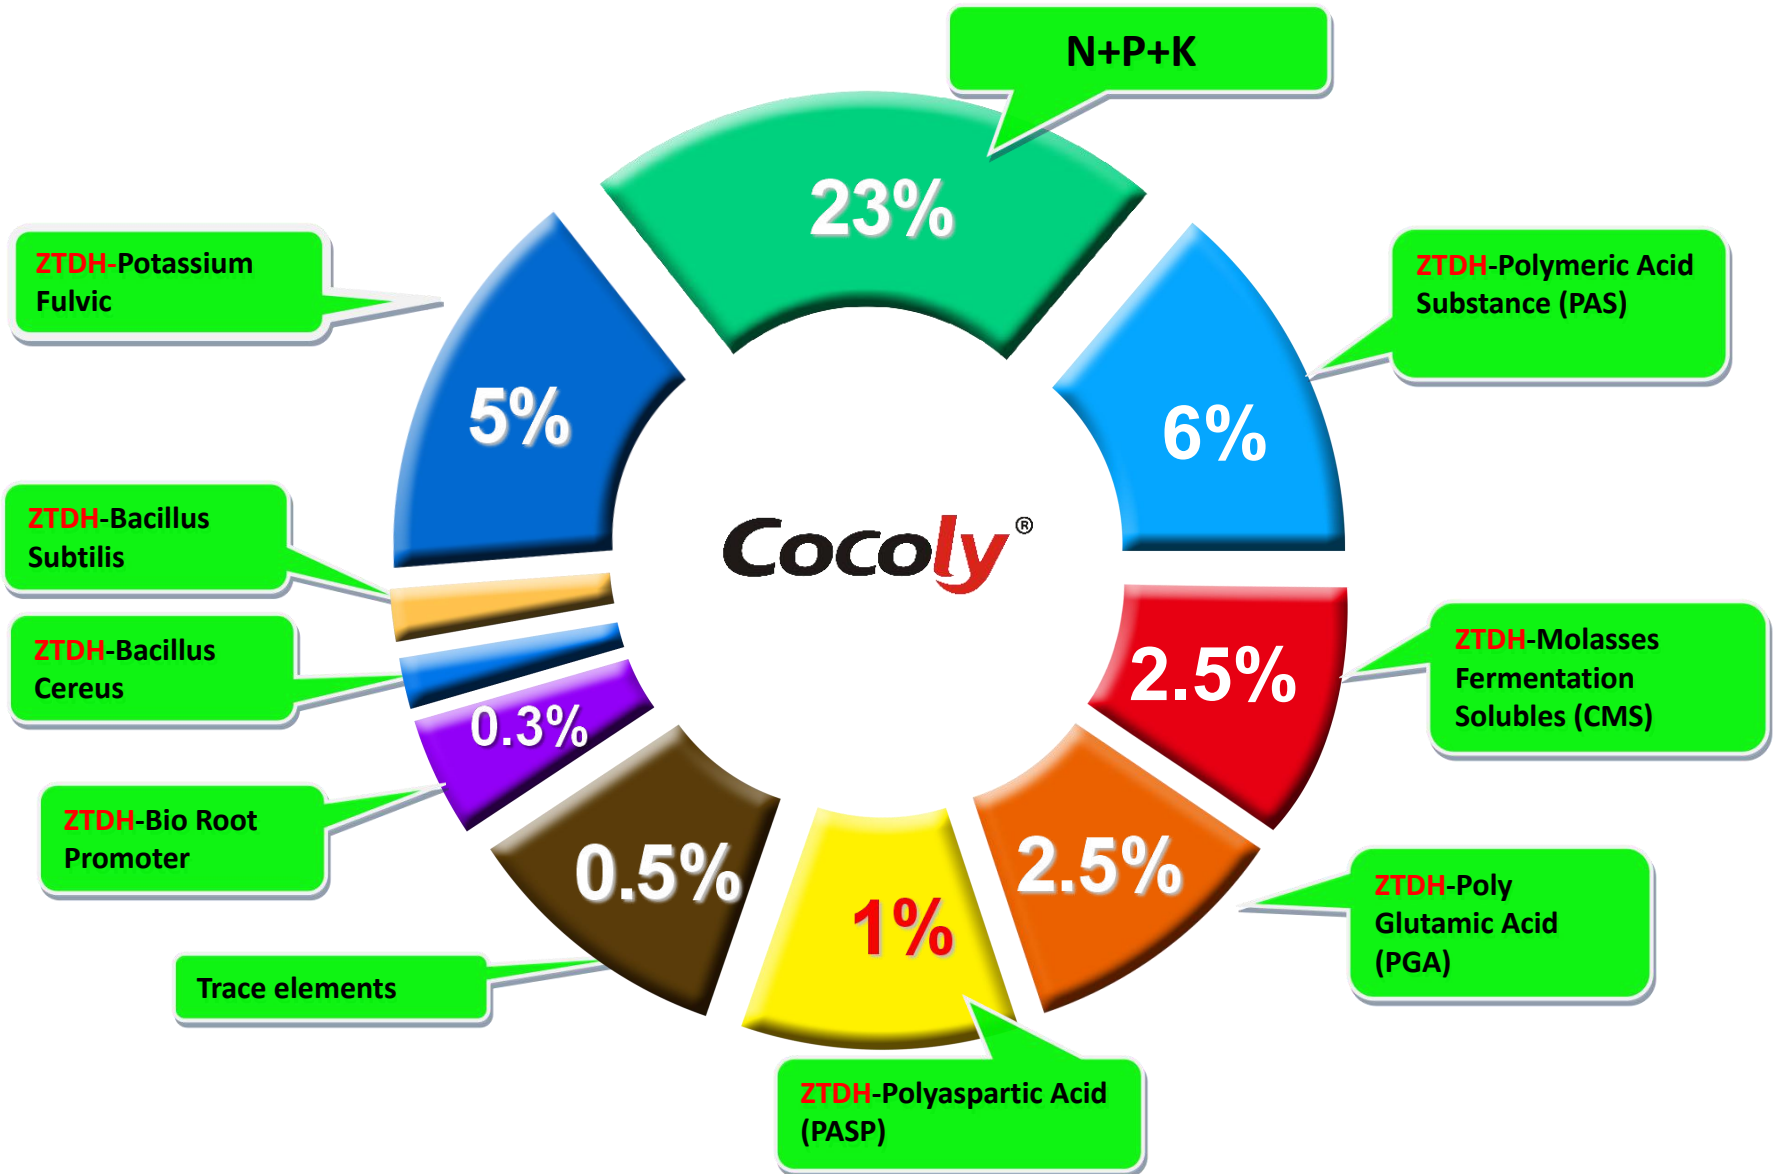

**Broadcast Fertilization**

**Blend with traditional fertilizer**

Different irrigation methods have different requirements for the form of fertilizers. Due to 100% water-solubility, Cocoly is suitable for **all irrigation and fertilization methods**. It is convenient to use, saving farmers a lot of manpower and time.

# Complete Formula & Special Nutrients

***Cocoly's amazing effect comes from a secret ingredient, PAS***

**PAS**

**Core Ingredient**

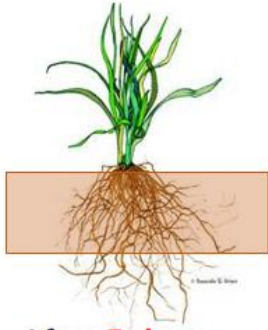

Founded from snail, extracted from peas, PAS (Polymeric Acid Substance) is the core ingredient of cocoly. Because of PAS, cocoly can adjust soil pH, improve crop resistance and improve the absorption rate of fertilizers to 90%.

\*National patent has been obtained, and the technology is only owned by cocoly company

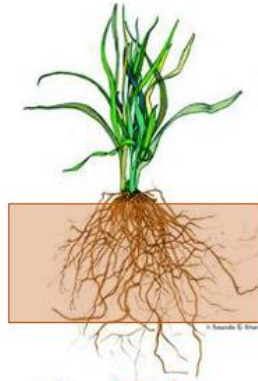

# Lock nutrients in the soil, high absorption and utilization rate

## The Nutrient Release of Cocoly

After 5 days

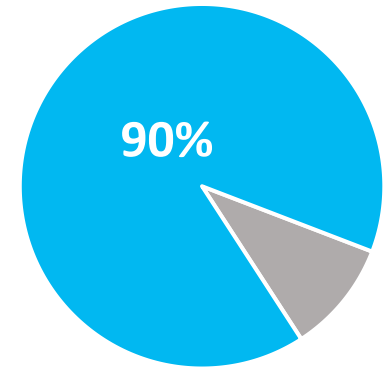

After 10 days

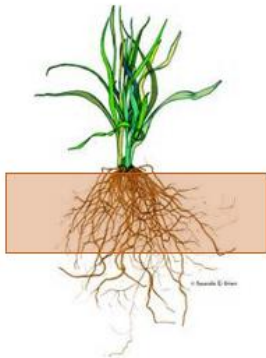

After 15 days

## Absorption rate of Cocoly fertilizer

## The Nutrient Release of Traditional Chemical Fertilizer

After 5 days

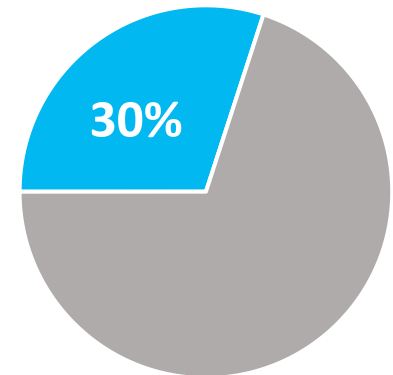

After 10 days

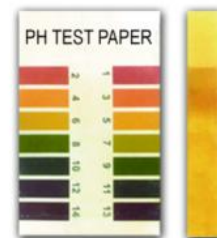

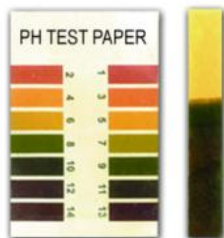

After 15 days

## Absorption rate of traditional fertilizer

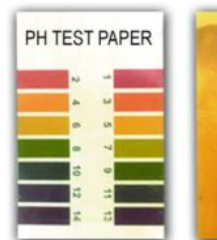

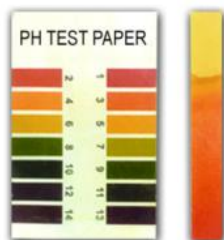

# Special Fuction: Balance Soil pH

## PH value regulation:

Cigarette ash PH value: 12

PH value regulated: 6.7

Vinegar PH value: 3

PH value regulated: 6.7

**TIPS: The plants are better planted in the soil with PH value of 6.5-7.**

## Onion's yield increased by 50% in Korea.

宋容观

洋葱还没收获。大概6月中旬收获  
预计产量大概7200公斤~8000公斤/一亩

Using cocoly: yield is

7200-8000kg/667m<sup>2</sup>

一般农家平均产量是4800公斤

~6000公斤/一亩

Other fertilizer: yield is

4800-6000kg/666m<sup>2</sup>

The yield of onion will be increased by around 50% 🍌🍌

## Tomato's yield increased by 20-37% in Guatemala.

ZI危地马拉客户

2nd harvest in Tomatoes, we have 20% up from farm with 1 Cocoly application at 40 kgs / Ha and 37% up from farm with 2 Cocoly applications

09:08

Cocoly 2 applications 09:09

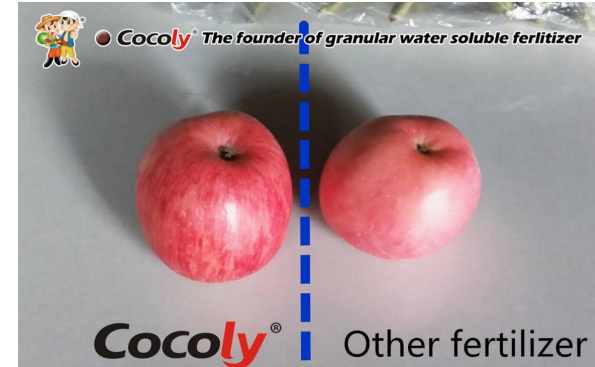

You can see that in farms area don't have to much fruits for the next harvest

09:10

Means that we will have more production that they have now

09:11

## The market price of apples using cocoly is much higher than others' in China

用施肥枪施

Use a small amount of cocoly in the beginning, use cocoly by flush irrigation or hole application in the 2nd swelling stage 果子发亮, 很漂亮

The market price of apples using cocoly this year is higher than others', right?

噢噢, 今年您的苹果应该比别家没用巧裸力的卖的价格高也快吧 🍌

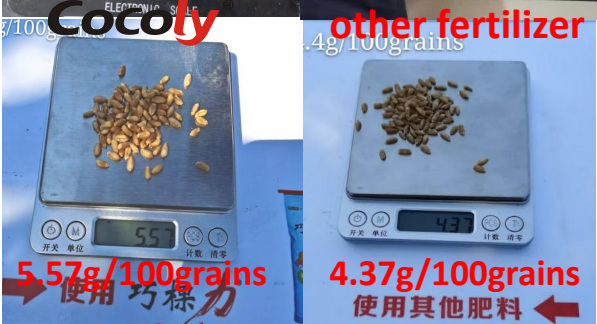

龚华疆

Exactly, my neighbor didn't use cocoly, his apples are not in good color, so apples have not been sold yet. Apple buyers don't want to choose his apples.

没错, 我旁边那家还没卖掉, 他的果子个头很大就是颜色不好, 来了好多老板都没看上

Cocoly fertilizer can be used in all crops, such as vegetables, fruits, wheat, corn, rice, coffee, flowers, etc.

Wheat's yield increased by **30%** in China, **56%** in Pakistan.

Cotton's yield increased by **36%** in China

Rice's yield increased by **40%** in Peru, **43%** in Malaysia.

RICE in the north of Peru 13:16  
**13,870 kg /Ha. Vs. Test: 9,800 kg/ Ha.....Cool**

At the same cost, cocoly fertilizer brings a better harvest

**Why choose Cocoly?**

# Cocoly Sales Are Far Ahead

# Cocoly Achievement

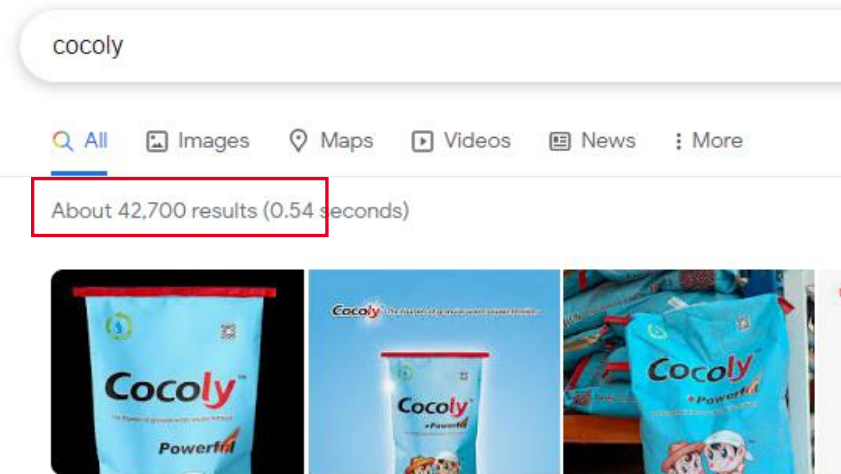

»»» **Cocoly's trademark has been registered in more than 70 countries,**  
and **Cocoly fertilizer has been exported to 46 countries.**

»»» Let global agriculture get good harvest

# Cocoly Brand Influence

Before 2013, there was no information about "**granular water-soluble fertilizer**" on the Internet. After cocoly entered the market in 2013, there are more and more information about cocoly on [Google](#) and [Baidu](#) (China's most authoritative search engine). Customers can learn the information of Cocoly easily, the representative of granular water-soluble fertilizer. This is cocoly's contribution to the granular water-soluble fertilizer industry.

Cocoly

Cocoly is the **founder of granular water soluble fertilizer** which is abundant and is fully soluble. It contains all nutritive elements required by plants in cycle and the rate of absorption and utilization can be up to above 90%. This resulted in its core ingredient PAS.
